HOW TO CREATE A MIND MAP

As you start out planning your life, there are certain questions that you need to ask yourself. Here are just a few of the things you should be thinking about.

1. Start in the center square, and fill in your topic, main idea, or visual aid. Beginning in the middle and branching out in multiple directions is similar to how the brain generates ideas in a non-linear manner.
2. Use colored pencils, markers and pens if possible. Color inspires creativity, which is the goal of brain storming.
3. Connect your main branches to your central idea, and then connect the outer shapes to the inner shapes. When you connect ideas by association, you will remember them easier.
4. Use single words to connect your ideas and thoughts to increase inspiration and future reference.
5. Draw images where possible, to illustrate your ideas more effectively.
